

Oncology digitised clinical documentation for the 21st century.

iNOTZ[®] (patented software) creates paperless medical notes, consent forms, letters & treatment plans immediately in clinic! Eliminating wait times of up to 13 weeks with £30k pa less cost & no paper. iNOTZ[®] enables oncologists to see 8 more patients each week, it's an extra working day!

Developed with oncologists in the UK & USA iNOTZ[®] follows the cancer clinical pathway capturing notes during consultation using ICD-10 & SNOMED-CT coding across 2,000+ data points. iNOTZ[®] *enables AI/ML modelling, quicker reimbursement, instant documentation & consistency amongst clinicians.*

Problem | Outdated Paper Records, MORE Patients & Dictation Costs

Vision | Unlocking Oncology Clinical Documentation DATA

We want Oncologists worldwide to benefit from the DATA in **Clinical Documentation & Medical Notes as a key Component of Precision Cancer Care**. From medical school students to front line oncologists & drug development companies unlocking the data in clinical notes can be transformational.

We'll remove the burden of paper notes with our “point & click” technology to free Oncologists' time & help them see more patients every week. And, in direct partnership with Oncology teams, we'll discover the insights that improve clinical pathways and help save patient lives across the Cancer spectrum.
